Question 351

Which of the following can be components of a VPC in the AWS Cloud? (Choose two.)

A. Amazon API Gateway

B. Amazon S3 buckets and objects

C. AWS Storage Gateway

D. Internet gateway ✅

E. Subnet ✅

Question 352

A company is building a new application on AWS. The company needs the application to remain available if an individual application component fails.

Which design principle should the company use to meet this requirement?

A. Disposable resources

B. Automation

C. Rightsizing

D. Loose coupling ✅

Question 353

A company wants to use a managed service to identify and protect sensitive data that is stored in Amazon S3.

Which AWS service will meet these requirements?

A. AWS IAM Access Analyzer

B. Amazon GuardDuty

C. Amazon Inspector

D. Amazon Macie ✅

Question 354

Which AWS service or feature can a user configure to limit network access at the subnet level?

A. AWS Shield

B. AWS WAF

C. Network ACL ✅

D. Security group

Question 355

Which AWS service can a company use to manage encryption keys in the cloud?

A. AWS License Manager

B. AWS Certificate Manager (ACM)

C. AWS CloudHSM ✅

D. AWS Directory Service

Question 356

A company wants to enhance security by launching a third-party ISP intrusion detection system from its AWS account.

Which AWS service or resource should the company use to meet this requirement?

A. AWS Security Hub

B. AWS Marketplace ✅

C. AWS Quick Starts

D. AWS Security Center

Question 357

What is a customer responsibility when using AWS Lambda according to the AWS shared responsibility model?

A. Managing the code within the Lambda function ✅

B. Confirming that the hardware is working in the data center

C. Patching the operating system

D. Shutting down Lambda functions when they are no longer in use

---

Question 358

How does the AWS Cloud help companies build agility into their processes and cloud infrastructure?

A. Companies can avoid provisioning too much capacity when they do not know how much capacity is required.

B. Companies can expand into new geographic regions.

C. Companies can access a range of technologies to experiment and innovate quickly. ✅

D. Companies can pay for IT resources only when they use the resources.

Question 359

Which AWS service or tool gives a company the ability to release application changes in an automated way?

A. Amazon AppFlow

B. AWS CodeDeploy ✅

C. AWS PrivateLink

D. Amazon EKS Distro

Question 360

Which AWS Cloud Adoption Framework (AWS CAF) perspective focuses on managing identities and permissions at scale?

A. Operations

B. Platform

C. Governance

D. Security ✅

Question 361

Which AWS service or feature allows users to securely store encrypted credentials and retrieve these credentials when required?

A. AWS Encryption SDK

B. AWS Security Hub

C. AWS Secrets Manager ✅

D. AWS Artifact

Question 362

Which pillar of the AWS Well-Architected Framework aligns with the ability to make frequent, small, and reversible changes to AWS Cloud architecture?

A. Security

B. Cost optimization

C. Operational excellence ✅

D. Performance efficiency

Question 363

Which AWS service or resource can a company use to deploy AWS WAF rules?

A. Amazon EC2

B. Application Load Balancer ✅

C. AWS Trusted Advisor

D. Network Load Balancer

Question 364

A company hosts its website on Amazon EC2 instances. The company needs to ensure that the website reaches a global audience and provides minimum latency to users.

Which AWS service should the company use to meet these requirements?

A. Amazon Route 53

B. Amazon CloudFront ✅

C. Elastic Load Balancing

D. AWS Lambda

Question 365

Which AWS design principle emphasizes the reduction of interdependencies between components of an application?

A. Scalability

B. Loose coupling ✅

C. Automation

D. Caching

Question 366

A company wants to provide one of its employees with access to Amazon RDS. The company also wants to limit the interaction to only the AWS CLI and AWS software development kits (SDKs).

Which combination of actions should the company take to meet these requirements while following the principles of least privilege? (Choose two.)

A. Create an IAM user and provide AWS Management Console access only.

B. Create an IAM user and provide programmatic access only. ✅

C. Create an IAM role and provide AWS Management Console access only.

D. Create an IAM policy with administrator access and attach it to the IAM user.

E. Create an IAM policy with Amazon RDS access and attach it to the IAM user. ✅

Question 367

A company is running a reporting web server application on Amazon EC2 instances. The application runs once every week and once again at the end of the month. The EC2 instances can be shut down when they are not in use.

What is the MOST cost-effective billing model for this use case?

A. Standard Reserved Instances

B. Convertible Reserved Instances

C. On-Demand Capacity Reservations

D. On-Demand Instances ✅

Question 368

A company has 5 TB of data stored in Amazon S3. The company plans to occasionally run queries on the data for analysis.

Which AWS service should the company use to run these queries in the MOST cost-effective manner?

A. Amazon Redshift

B. Amazon Athena ✅

C. Amazon Kinesis

D. Amazon RDS

Question 369

A company wants to discover, prepare, move, and integrate data from multiple sources for data analytics and machine learning.

Which AWS serverless data integration service should the company use to meet these requirements?

A. AWS Glue ✅

B. AWS Data Exchange

C. Amazon Athena

D. Amazon EMR

Question 370

A company is moving its development and test environments to AWS to increase agility and reduce cost. Because these are not production workloads and the servers are not fully utilized, occasional unavailability is acceptable.

What is the MOST cost-effective Amazon EC2 pricing model that will meet these requirements?

A. Reserved Instances

B. On-Demand Instances

C. Spot Instances ✅

D. Dedicated Hosts

Question 371

A company deploys its application on Amazon EC2 instances. The application occasionally experiences sudden increases in demand. The company wants to ensure that its application can respond to changes in demand at the lowest possible cost.

Which AWS service or concept will meet these requirements?

A. AWS Auto Scaling ✅

B. AWS Compute Optimizer

C. AWS Cost Explorer

D. AWS Well-Architected Framework

Question 372

A company wants to organize its users so that the company can grant permissions to the users as a group.

Which AWS service or tool can the company use to meet this requirement?

A. Security groups

B. AWS Identity and Access Management (IAM) ✅

C. Resource groups

D. AWS Security Hub

Question 373

A company wants to build an application that uses AWS Lambda to run Python code.

Under the AWS shared responsibility model, which tasks will be the company's responsibility? (Choose two.)

A. Management of the underlying infrastructure.

B. Management of the operating system.

C. Writing the business logic code. ✅

D. Installation of the computer language runtime.

E. Providing AWS Identity and Access Management (IAM) access to the Lambda service. ✅

Question 374

A company needs to identify who accessed an AWS service and what action was performed for a given time period.

Which AWS service should the company use to meet this requirement?

A. Amazon CloudWatch

B. AWS CloudTrail ✅

C. AWS Security Hub

D. Amazon Inspector

Question 375

A company wants to use a centralized AWS service to enforce compliance with the organizational business standards. The company wants to use an AWS service that can govern and control who can deploy, manage, and decommission AWS resources.

Which AWS service will meet these requirements?

A. Amazon CloudWatch

B. AWS Service Catalog ✅

C. Amazon GuardDuty

D. AWS Security Hub

Question 376

What does "security of the cloud" refer to in the AWS shared responsibility model?

A. Availability of AWS services such as Amazon EC2

B. Security of the cloud infrastructure that runs all the AWS services ✅

C. Implementation of password policies for IAM users

D. Security of customer environments by using AWS Network Firewall partners

---

Question 377

A company has an application that produces unstructured data continuously. The company needs to store the data so that the data is durable and easy to query.

Which AWS service can the company use to meet these requirements?

A. Amazon RDS

B. Amazon Aurora

C. Amazon QuickSight

D. Amazon DynamoDB ✅

Question 378

Which options are AWS Cloud Adoption Framework (AWS CAF) perspectives? (Choose two.)

A. Cloud fluency

B. Security

C. Change acceleration

D. Architecture

E. Business ✅

Question 379

Which AWS service can be used at no additional cost?

A. Amazon SageMaker

B. AWS Config

C. AWS Organizations ✅

D. Amazon CloudWatch

Question 380

A company wants to migrate a company's on-premises container infrastructure to the AWS Cloud. The company wants to prevent unplanned administration and operation cost and adapt to a serverless architecture.

Which AWS service will meet these requirements?

A. Amazon Connect

B. AWS Fargate ✅

C. Amazon Lightsail

D. Amazon EC2

Question 381

A company wants its Amazon EC2 instances to be in different locations but share the same geographic area. The company also wants to use multiple power grids and independent networking connectivity for the EC2 instances.

Which solution meets these requirements?

A. Use EC2 instances in multiple edge locations in the same AWS Region.

B. Use EC2 instances in multiple Availability Zones in the same AWS Region. ✅

C. Use EC2 instances in multiple Amazon Connect locations in the same AWS Region.

D. Use EC2 instances in multiple AWS Artifact locations in the same AWS Region.

Question 382

An ecommerce company has deployed a new web application on Amazon EC2 instances. The company wants to distribute incoming HTTP traffic evenly across all running instances.

Which AWS service or resource will meet this requirement?

A. Amazon EC2 Auto Scaling

B. Application Load Balancer ✅

C. Gateway Load Balancer

D. Network Load Balancer

Question 383

Which AWS service or feature gives users the ability to connect VPCs and on-premises networks to a central hub?

A. Virtual private gateway

B. AWS Transit Gateway ✅

C. Internet gateway

D. Customer gateway

Question 384

A company wants to run CPU-intensive workload across multiple Amazon EC2 instances.

Which EC2 instance type should the company use to meet this requirement?

A. General purpose instances

B. Compute optimized instances ✅

C. Memory optimized instances

D. Storage optimized instances

Question 385

A company is connecting multiple VPCs and on-premises networks. The company needs to use an AWS service as a cloud router to simplify peering relationships.

Which AWS service can the company use to meet this requirement?

A. AWS Direct Connect

B. AWS Transit Gateway ✅

C. Amazon Connect

D. Amazon Route 53

Question 386

A company stores a large amount of data that auditors access only twice each year.

Which Amazon S3 storage class should the company use to store the data with the LOWEST cost?

A. Amazon S3 Outposts

B. Amazon S3 Glacier Instant Retrieval

C. Amazon S3 Standard

D. Amazon S3 Intelligent-Tiering ✅

Question 387

Which action should a company take to improve security in its AWS account?

A. Require multi-factor authentication (MFA) for privileged users. ✅

B. Remove the root user account.

C. Create an access key for the AWS account root user.

D. Create an access key for each privileged user.

Question 388

Which of the following are ways to improve security on AWS? (Choose two.)

A. Using AWS Artifact

B. Granting the broadest permissions to all IAM roles

C. Running application code with AWS Cloud

D. Enabling multi-factor authentication (MFA) with Amazon Cognito ✅

E. Using AWS Trusted Advisor security checks ✅

Question 389

Which AWS service can a company use to manage encryption keys in the cloud?

A. AWS License Manager

B. AWS Certificate Manager (ACM)

C. AWS CloudHSM ✅

D. AWS Directory Service

Question 390

Which AWS Cloud Adoption Framework (AWS CAF) capability belongs to the people perspective?

A. Data architecture

B. Event management

C. Cloud fluency ✅

D. Strategic partnership

Question 391

A company wants to store its files in the AWS Cloud. Users need to be able to download these files directly using a public URL.

Which AWS service or feature will meet this requirement?

A. Amazon Redshift

B. Amazon Elastic Block Store (Amazon EBS)

C. Amazon Elastic File System (Amazon EFS)

D. Amazon S3 ✅

Question 392

A company is using AWS for all its IT infrastructure. The company's developers are allowed to deploy applications on their own. The developers want to deploy their applications without having to provision the infrastructure themselves.

Which AWS service should the developers use to meet these requirements?

A. AWS CloudFormation

B. AWS CodeBuild

C. AWS Elastic Beanstalk ✅

D. AWS CodeDeploy

Question 393

A company wants to gain insights from its data and build interactive data visualization dashboards.

Which AWS service will meet these requirements?

A. Amazon SageMaker

B. Amazon Rekognition

C. Amazon QuickSight ✅

D. Amazon Kinesis

Question 394

A cloud engineer wants to store data in Amazon S3. The engineer will access some of the data yearly and some of the data daily.

Which S3 storage class will meet these requirements MOST cost-effectively?

A. S3 Standard

B. S3 Glacier Deep Archive

C. S3 One Zone-Infrequent Access (S3 One Zone-IA)

D. S3 Intelligent-Tiering ✅

Question 395

Which of the following are economic benefits of using the AWS Cloud? (Choose two.)

A. Consumption-based pricing ✅

B. Perpetual licenses

C. Economies of scale ✅

D. AWS Enterprise Support at no additional cost

E. Bring-your-own-hardware model

Question 396

A user is moving a workload from a local data center to an architecture that is distributed between the local data center and the AWS Cloud.

Which type of migration is this?

A. On-premises to cloud native

B. Hybrid to cloud native

C. On-premises to hybrid ✅

D. Cloud native to hybrid

Question 397

A company needs to store infrequently used data for data archives and long-term backups.

Which AWS service or storage class will meet these requirements MOST cost-effectively?

A. Amazon FSx for Lustre

B. Amazon Elastic Block Store (Amazon EBS)

C. Amazon Elastic File System (Amazon EFS)

D. Amazon S3 Glacier Flexible Retrieval ✅

Question 398

Which AWS service provides users with AWS issued reports, certifications, accreditations, and third-party attestations?

A. AWS Artifact ✅

B. AWS Trusted Advisor

C. AWS Health Dashboard

D. AWS Config

Question 399

A company needs to create and publish interactive business intelligence dashboards. The dashboards require insights that are powered by machine learning.

Which AWS service or tool will meet these requirements?

A. AWS Glue Studio

B. Amazon QuickSight ✅

C. Amazon Redshift

D. Amazon Athena

Question 400

A company wants to use AWS. The company has stringent requirements about low-latency access to on-premises systems and data residency.

Which AWS service should the company use to design a solution that meets these requirements?

A. AWS Wavelength

B. AWS Transit Gateway

C. AWS Ground Station

D. AWS Outposts ✅

Question 401

A company wants to make an upfront commitment for continued use of its production Amazon EC2 instances in exchange for a reduced overall cost.

Which pricing options meet these requirements with the LOWEST cost? (Choose two.)

A. Spot Instances

B. On-Demand Instances

C. Reserved Instances ✅

D. Savings Plans ✅

E. Dedicated Hosts

Question 402

A company runs an on-premises contact center for customers. The company needs to migrate to a cloud-based solution that can deliver artificial intelligence features to improve user experience.

Which AWS service will meet these requirements?

A. AWS Wavelength

B. AWS IAM Identity Center (AWS Single Sign-On)

C. AWS Direct Connect

D. Amazon Connect ✅

Question 403

A company needs the ability to acquire resources when the resources are needed. The company also needs the ability to release the resources when the resources are no longer needed.

Which AWS concept represents the company's goals?

A. Scalability

B. Sustainability

C. Elasticity ✅

D. Operational excellence

Question 404

A company wants to use Amazon EC2 instances for a stable production workload that will run for 1 year.

Which instance purchasing option meets these requirements MOST cost-effectively?

A. Dedicated Hosts

B. Reserved Instances ✅

C. On-Demand Instances

D. Spot Instances

Question 405

A company wants to log in securely to Linux Amazon EC2 instances.

How can the company accomplish this goal?

A. Use SSH keys. ✅

B. Use a VPN.

C. Use end-to-end encryption.

D. Use Amazon Route 53.

Question 406

A company wants to use a serverless compute service for an application.

Which AWS service will meet this requirement?

A. AWS Lambda ✅

B. AWS CloudFormation

C. AWS Elastic Beanstalk

D. Elastic Load Balancing

Question 407

A company wants a solution that will automatically adjust the number of Amazon EC2 instances that are being used based on the current load.

Which AWS offering will meet these requirements?

A. Dedicated Hosts

B. Placement groups

C. Auto Scaling groups ✅

D. Reserved Instances

Question 408

A company is building AWS architecture to deliver real-time data feeds from an on-premises data center into an application that runs on AWS. The company needs a consistent network connection with minimal latency.

What should the company use to connect the application and the data center to meet these requirements?

A. AWS Direct Connect ✅

B. Public internet

C. AWS VPN

D. Amazon Connect

Question 409

A company plans to migrate its custom marketing application and order-processing application to AWS. The company needs to deploy the applications on different types of instances with various configurations of CPU, memory, storage, and networking capacity.

Which AWS service should the company use to meet these requirements?

A. AWS Lambda

B. Amazon Cognito

C. Amazon Athena

D. Amazon EC2 ✅

Question 410

A company wants to monitor and block malicious HTTP and HTTPS requests that its Amazon CloudFront distributions receive.

Which AWS service should the company use to meet these requirements?

A. Amazon GuardDuty

B. Amazon Inspector

C. AWS WAF ✅

D. Amazon Detective

Question 411

Which AWS services can host PostgreSQL databases? (Choose two.)

A. Amazon S3

B. Amazon Aurora ✅

C. Amazon EC2 ✅

D. Amazon OpenSearch Service

E. Amazon Elastic File System (Amazon EFS)

Question 412

A company wants to migrate its on-premises relational databases to the AWS Cloud. The company wants to use infrastructure as close to its current geographical location as possible.

Which AWS service or resource should the company use to select its Amazon RDS deployment area?

A. Amazon Connect

B. AWS Wavelength

C. AWS Regions ✅

D. AWS Direct Connect

Question 413

Which AWS service can generate information that can be used by external auditors?

A. Amazon Cognito

B. Amazon FSx

C. AWS Config ✅

D. Amazon Inspector

Question 414

Which AWS service or feature requires an internet service provider (ISP) and a colocation facility to be implemented?

A. AWS VPN

B. Amazon Connect

C. AWS Direct Connect ✅

D. Internet gateway

Question 415

A company wants its Amazon EC2 instances to operate in a highly available environment, even if there is a natural disaster in a particular geographic area.

Which solution achieves this goal?

A. Use EC2 instances in multiple AWS Regions. ✅

B. Use EC2 instances in multiple edge locations.

C. Use EC2 instances in the same Availability Zone but in different AWS Regions.

D. Use Amazon CloudFront with the EC2 instances configured as the source.

Question 416

Which AWS service allows for file sharing between multiple Amazon EC2 instances?

A. AWS Direct Connect

B. AWS Snowball Edge

C. AWS Backup

D. Amazon Elastic File System (Amazon EFS) ✅

Question 417

A company needs to manage multiple logins across AWS accounts within the same organization in AWS Organizations.

Which AWS service should the company use to meet this requirement?

A. Amazon VPC

B. Amazon GuardDuty

C. Amazon Cognito

D. AWS IAM Identity Center ✅

Question 418

A company uses Amazon WorkSpaces.

Which task is the responsibility of AWS, according to the AWS shared responsibility model?

A. Set up multi-factor authentication (MFA) for each WorkSpaces user account.

B. Ensure the environmental safety and security of the AWS infrastructure that hosts WorkSpaces. ✅

C. Provide security for WorkSpaces user accounts through AWS Identity and Access Management (IAM).

D. Configure AWS CloudTrail to log API calls and user activity.

Question 419

A company is migrating its public website to AWS. The company wants to host the domain name for the website on AWS.

Which AWS service should the company use to meet this requirement?

A. AWS Lambda

B. Amazon Route 53 ✅

C. Amazon CloudFront

D. AWS Direct Connect

Question 420

A company uses a third-party identity provider (IdP). The company wants to provide its employees with access to AWS accounts and services without requiring another set of login credentials.

Which AWS service will meet this requirement?

A. AWS Directory Service

B. Amazon Cognito

C. AWS IAM Identity Center ✅

D. AWS Resource Access Manager (AWS RAM)

Question 421

Which combination of AWS services can be used to move a commercial relational database to an Amazon-managed open-source database? (Choose two.)

A. AWS Database Migration Service (AWS DMS) ✅

B. AWS software development kits (SDKs)

C. AWS Schema Conversion Tool ✅

D. AWS Systems Manager

E. Amazon EMR

Question 422

Which AWS service gives users on-demand, self-service access to AWS compliance control reports?

A. AWS Config

B. Amazon GuardDuty

C. AWS Trusted Advisor

D. AWS Artifact ✅

Question 423

A company is exploring the use of the AWS Cloud, and needs to create a cost estimate for a project before the infrastructure is provisioned.

Which AWS service or feature can be used to estimate costs before deployment?

A. AWS Free Tier

B. AWS Pricing Calculator ✅

C. AWS Billing and Cost Management

D. AWS Cost and Usage Report

Question 424

A company runs a legacy workload in an on-premises data center. The company wants to migrate the workload to AWS. The company does not want to make any changes to the workload.

Which migration strategy should the company use?

A. Repurchase

B. Replatform

C. Rehost ✅

D. Refactor

Question 425

A company is planning to migrate applications to the AWS Cloud. During a system audit, the company finds that its content management system (CMS) application is incompatible with cloud environments.

Which migration strategies will help the company to migrate the CMS application with the LEAST effort? (Choose two.)

A. Retire ✅

B. Rehost ✅

C. Repurchase

D. Replatform

E. Refactor

Question 426

Which of the following are AWS best practice recommendations for the use of AWS Identity and Access Management (IAM)? (Choose two.)

A. Use the AWS account root user for daily access.

B. Use access keys and secret access keys on Amazon EC2.

C. Rotate credentials on a regular basis. ✅

D. Create a shared set of access keys for system administrators.

E. Configure multi-factor authentication (MFA). ✅

Question 427

Which option is AWS responsible for under the AWS shared responsibility model?

A. Network and firewall configuration

B. Client-side data encryption

C. Management of user permissions

D. Hardware and infrastructure ✅

Question 428

A company wants to run a graph query that provides credit card users' names, addresses, and transactions. The company wants the graph to show if the names, addresses, and transactions indicates possible fraud.

Which AWS database service will meet these requirements?

A. Amazon DocumentDB (with MongoDB compatibility)

B. Amazon Timestream

C. Amazon DynamoDB

D. Amazon Neptune ✅

Question 429

Which AWS service provides machine learning capability to detect and analyze content in images and videos?

A. Amazon Connect

B. Amazon Lightsail

C. Amazon Personalize

D. Amazon Rekognition ✅

Question 430

A company wants its AWS usage to be more sustainable. The company wants to track, measure, review, and forecast polluting emissions that result from its AWS applications.

Which AWS service or tool can the company use to meet these requirements?

A. AWS Health Dashboard

B. AWS customer carbon footprint tool ✅

C. AWS Support Center

D. Amazon QuickSight

Question 431

Which AWS service gives users the ability to deploy highly repeatable infrastructure configurations?

A. AWS CloudFormation ✅

B. AWS CodeDeploy

C. AWS CodeBuild

D. AWS Systems Manager

Question 432

A company needs to provide customer service by using voice calls and web chat features.

Which AWS service should the company use to meet these requirements?

A. Amazon Aurora

B. Amazon Connect ✅

C. Amazon WorkSpaces

D. AWS Organizations

Question 433

Which AWS service is designed to help users handle large amounts of data in a data warehouse environment?

A. Amazon RDS

B. Amazon DynamoDB

C. Amazon Redshift ✅

D. Amazon Aurora

Question 434

A company is building an application that needs to deliver images and videos globally with minimal latency.

Which approach can the company use to accomplish this in a cost effective manner?

A. Deliver the content through Amazon CloudFront. ✅

B. Store the content on Amazon S3 and enable S3 cross-region replication.

C. Implement a VPN across multiple AWS Regions.

D. Deliver the content through AWS PrivateLink.

Question 435

A company is building a web application using AWS.

Which AWS service will help prevent network layer DDoS attacks against the web application?

A. AWS WAF

B. AWS Firewall Manager

C. Amazon GuardDuty

D. AWS Shield ✅

Question 436

Which AWS compute service gives users the ability to securely and reliably run containers at scale?

A. Amazon Elastic Container Service (Amazon ECS) ✅

B. Amazon Aurora

C. Amazon Athena

D. Amazon Polly

Question 437

Which AWS tool or feature acts as a VPC firewall at the subnet level?

A. Security group

B. Network ACL ✅

C. Traffic Mirroring

D. Internet gateway

Question 438

A company runs an application on AWS that performs batch jobs. The application is fault-tolerant and can handle interruptions. The company wants to optimize the cost to run the application.

Which AWS offering will meet these requirements?

A. Amazon Macie

B. Amazon Neptune

C. Amazon EC2 Spot Instances ✅

D. Amazon EC2 On-Demand Instances

Question 439

Which AWS service can be used to send alerts when a specific Amazon CloudWatch alarm is invoked?

A. AWS CloudTrail

B. Amazon Simple Notification Service (Amazon SNS) ✅

C. Amazon Simple Queue Service (Amazon SQS)

D. Amazon EventBridge

Question 440

A cloud practitioner wants to use a highly available and scalable DNS service for its AWS workload.

Which AWS service will meet this requirement?

A. Amazon Route 53 ✅

B. Amazon Lightsail

C. AWS Amplify Hosting

D. Amazon S3

Question 441

According to the AWS shared responsibility model, which task is the customer's responsibility?

A. Maintaining the infrastructure needed to run AWS Lambda

B. Updating the operating system of Amazon DynamoDB instances

C. Maintaining Amazon S3 infrastructure

D. Updating the guest operating system on Amazon EC2 instances. ✅

Question 442

A company is learning about its responsibilities that are related to the management of Amazon EC2 instances.

Which tasks for EC2 instances are the company's responsibility, according to the AWS shared responsibility model? (Choose two.)

A. Install and patch the machine hypervisor.

B. Patch the guest operating system. ✅

C. Encrypt data at rest on associated storage. ✅

D. Install the physical hardware and cabling.

E. Provide physical security for the EC2 instances.

Question 443

A company runs MySQL database workloads on self-managed servers in an on-premises data center. The company wants to migrate the database workloads to an AWS managed service.

Which migration strategy should the company use?

A. Rehost

B. Repurchase

C. Refactor

D. Replatform. ✅

Question 444

Which option is a customer responsibility when using Amazon DynamoDB under the AWS Shared Responsibility Model?

A. Physical security of DynamoDB

B. Patching of DynamoDB

C. Access to DynamoDB tables. ✅

D. Encryption of data at rest in DynamoDB

Question 445

Which option is a benefit of the economies of scale based on the advantages of cloud computing?

A. The ability to trade variable expense for fixed expense

B. Increased speed and agility

C. Lower variable costs over fixed costs. ✅

D. Increased operational costs across data centers

Question 446

A company is planning to migrate a monolithic application to AWS. The company wants to modernize the application by splitting it into microservices. The company will deploy the microservices on AWS.

Which migration strategy should the company use?

A. Rehost

B. Repurchase

C. Replatform

D. Refactor. ✅

Question 447

A company wants to implement detailed tracking of its cloud costs by department and project.

Which AWS feature or service should the company use?

A. Consolidated billing

B. Cost allocation tags. ✅

C. AWS Marketplace

D. AWS Budgets

Question 448

A user wants to invoke an AWS Lambda function when an Amazon EC2 instance enters the “stopping” state.

Which AWS service is appropriate for this use case?

A. Amazon EventBridge. ✅

B. AWS Config

C. Amazon Simple Notification Service (Amazon SNS)

D. AWS CloudFormation

Question 449

A company has a MariaDB database on premises. The company wants to move the data to the AWS Cloud.

Which AWS service will host this database with the LEAST amount of operational overhead?

A. Amazon RDS. ✅

B. Amazon Neptune

C. Amazon S3

D. Amazon DynamoDB

Question 450

Which AWS service or feature supports governance, compliance, and risk auditing of AWS accounts?

A. Multi-factor authentication (MFA)

B. AWS Lambda

C. Amazon Simple Notification Service (Amazon SNS)

D. AWS CloudTrail. ✅

Question 451

Which AWS Cloud design principle is a company using when the company implements AWS CloudTrail?

A. Activate traceability. ✅

B. Use serverless compute architectures.

C. Perform operations as code.

D. Go global in minutes.

Question 452

A company needs a threat detection service that will continuously monitor its AWS accounts, workloads, and Amazon S3 buckets for malicious activity and unauthorized behavior.

Which AWS service meets these requirements?

A. AWS Shield

B. AWS Firewall Manager

C. Amazon GuardDuty. ✅

D. Amazon Inspector

Question 453

A company is planning to migrate to the AWS Cloud. The company is conducting organizational transformation and wants to become more responsive to customer inquiries and feedback.

Which task should the company perform to meet these requirements, according to the AWS Cloud Adoption Framework (AWS CAF)?

A. Realign teams to focus on products and value streams. ✅

B. Create new value propositions with new products and services.

C. Use a new data and analytics platform to create actionable insights.

D. Migrate and modernize legacy infrastructure.

Question 454

A company wants to rightsize its Amazon EC2 instances.

Which configuration change will meet this requirement with the LEAST operational overhead?

A. Add EC2 instances in another Availability Zone.

B. Change the size and type of the EC2 instances based on utilization. ✅

C. Convert the payment method from On-Demand to Savings Plans.

D. Reprovision the EC2 instances with a larger instance type.

Question 455

Which AWS service supports user sign-up functionality and authentication to mobile and web applications?

A. Amazon Cognito. ✅

B. AWS Config

C. Amazon GuardDuty

D. AWS Systems Manager

Question 456

Which of the following is a software development framework that a company can use to define cloud resources as code and provision the resources through AWS CloudFormation?

A. AWS CLI

B. AWS Developer Center

C. AWS Cloud Development Kit (AWS CDK). ✅

D. AWS CodeStar

Question 457

Which benefit of the AWS Cloud helps companies achieve lower usage costs because of the aggregate usage of all AWS users?

A. No need to guess capacity

B. Ability to go global in minutes

C. Economies of scale. ✅

D. Increased speed and agility

Question 458

Which task is the responsibility of the customer, according to the AWS shared responsibility model?

A. Patch the Amazon DynamoDB operating system.

B. Secure Amazon CloudFront edge locations by allowing physical access according to the principle of least privilege.

C. Protect the hardware that runs AWS services.

D. Use AWS Identity and Access Management (IAM) according to the principle of least privilege. ✅

Question 459

A company wants to manage its cloud resources by using infrastructure as code (IaC) templates. The company needs to meet compliance requirements.

Which AWS service should the company use to meet these requirements?

A. AWS Artifact

B. AWS Resource Explorer

C. AWS License Manager

D. AWS Service Catalog. ✅

Question 460

A systems administrator wants to monitor the CPU utilization of a company's Amazon EC2 instances.

Which AWS service can provide this information?

A. AWS Config

B. AWS Trusted Advisor

C. AWS CloudTrail

D. Amazon CloudWatch. ✅

Question 461

A company wants to migrate all of its on-premises infrastructure to the AWS Cloud. Before migration, the company wants estimate of costs for running its as-is infrastructure.

Which AWS service or principle should the company use to meet this requirement?

A. AWS Pricing Calculator. ✅

B. AWS Well-Architected Framework

C. AWS shared responsibility model

D. AWS Cloud Adoption Framework (AWS CAF)

Question 462

An independent software vendor wants to deliver and share its custom Amazon Machine Images (AMIs) to prospective customers.

Which AWS service will meet these requirements?

A. AWS Marketplace. ✅

B. AWS Data Exchange

C. Amazon EC2

D. AWS Organizations

Question 463

Which component must be attached to a VPC to enable inbound internet access?

A. NAT gateway

B. VPC endpoint

C. VPN connection

D. Internet gateway. ✅

Question 464

Which AWS service supports a company's ability to treat infrastructure as code?

A. AWS CodeDeploy

B. AWS Elastic Beanstalk

C. Amazon API Gateway

D. AWS CloudFormation. ✅

Question 465

A company is building an application that will receive millions of database queries each second. The company needs the data store for the application to scale to meet these needs.

Which AWS service will meet this requirement?

A. Amazon DynamoDB. ✅

B. AWS Cloud9

C. Amazon ElastiCache for Memcached

D. Amazon Neptune

Question 466

An AWS user wants to proactively detect when an instance or account might be compromised or if there are threats from attacks.

Which AWS service should the user choose?

A. Amazon GuardDuty. ✅

B. AWS WAF

C. AWS Shield

D. Amazon Inspector

Question 467

A company is developing an application that uses multiple AWS services. The application needs to use temporary, limited-privilege credentials for authentication with other AWS APIs.

Which AWS service or feature should the company use to meet these authentication requirements?

A. Amazon API Gateway

B. IAM users

C. AWS Security Token Service (AWS STS). ✅

D. IAM instance profiles

Question 468

Which AWS Support plan provides the full set of AWS Trusted Advisor checks at the LOWEST cost?

A. AWS Developer Support

B. AWS Business Support. ✅

C. AWS Enterprise On-Ramp Support

D. AWS Enterprise Support

Question 469

A company's application is running on Amazon EC2 instances. The company is planning a partial migration to a serverless architecture in the next year and wants to pay for resources up front.

Which AWS purchasing option will optimize the company's costs?

A. Convertible Reserved Instances. ✅

B. Spot Instances

C. EC2 Instance Savings Plans

D. Compute Savings Plan

Question 470

A retail company is building a new mobile app. The company is evaluating whether to build the app at an on-premises data center or in the AWS Cloud.

Which of the following are benefits of building this app in the AWS Cloud? (Choose two.)

A. A large, upfront capital expense and low variable expenses

B. Increased speed for trying out new projects. ✅

C. Complete control over the physical security of the infrastructure

D. Flexibility to scale up in minutes as the application becomes popular. ✅

E. Ability to pick the specific data centers that will host the application servers

---

Question 471

A company must archive its documents by using a write-once, read-many (WORM) model to meet legal and compliance obligations.

Which feature of Amazon S3 can the company use to meet this requirement?

A. S3 Versioning

B. S3 bucket policy

C. S3 Glacier Vault Lock. ✅

D. S3 multi-factor authentication (MFA) delete

Question 472

A company has batch workloads that need to run for short periods of time on Amazon EC2. The workloads can handle interruptions and can start again from where they ended.

What is the MOST cost-effective EC2 instance purchasing option to meet these requirements?

A. Reserved Instances

B. Spot Instances. ✅

C. Dedicated Instances

D. On-Demand Instances

Question 473

A company needs to deploy a PostgreSQL database into Amazon RDS. The database must be highly available and fault tolerant.

Which AWS solution should the company use to meet these requirements?

A. Amazon RDS with a single Availability Zone

B. Amazon RDS snapshots

C. Amazon RDS with multiple Availability Zones. ✅

D. AWS Database Migration Service (AWS DMS)

Question 474

What is the MOST secure way to store passwords on AWS?

A. Store passwords in an Amazon S3 bucket.

B. Store passwords as AWS CloudFormation parameters.

C. Store passwords in AWS Storage Gateway.

D. Store passwords in AWS Secrets Manager. ✅

Question 475

Which statements accurately describe the relationships among components of AWS global infrastructure? (Choose two.)

A. There are more AWS Regions than Availability Zones.

B. There are more edge locations than AWS Regions. ✅

C. An edge location is an Availability Zone.

D. There are more AWS Regions than edge locations.

E. There are more Availability Zones than AWS Regions. ✅

Question 476

Which AWS service provides DNS resolution?

A. Amazon CloudFront

B. Amazon VPC

C. Amazon Route 53. ✅

D. AWS Direct Connect

Question 477

A company needs to host an application in a specific geographic area to comply with regulations.

Which feature of the AWS global infrastructure will help the company meet this requirement?

A. Scalability

B. Global footprint. ✅

C. Availability

D. Performance

Question 478

Which AWS service is a cloud security posture management (CSPM) service that aggregates alerts from various AWS services and partner products in a standardized format?

A. AWS Security Hub. ✅

B. AWS Trusted Advisor

C. Amazon EventBridge

D. Amazon GuardDuty

Question 479

An ecommerce company plans to move its data center workload to the AWS Cloud to support highly dynamic usage patterns.

Which benefits make the AWS Cloud cost-effective for the migration of this type of workload? (Choose two.)

A. Reliability

B. Security

C. Elasticity. ✅

D. Pay-as-you-go resource. ✅

E. High availability

Question 480

When designing AWS workloads to be operational even when there are component failures, what is an AWS best practice?

A. Perform quarterly disaster recovery tests.

B. Place the main component on the us-east-1 Region.

C. Design for automatic failover to healthy resources. ✅

D. Design workloads to fit on a single Amazon EC2 instance.

Question 481

Which of the following can the AWS Pricing Calculator do?

A. Project monthly AWS costs. ✅

B. Calculate historical AWS costs.

C. Provide in-depth information about AWS pricing strategies.

D. Provide users with access to their monthly bills.

Question 482

Which AWS solution gives companies the ability to use protocols such as NFS to store and retrieve objects in Amazon S3?

A. Amazon FSx for Lustre

B. AWS Storage Gateway volume gateway

C. AWS Storage Gateway file gateway. ✅

D. Amazon Elastic File System (Amazon EFS)

Question 483

A user has been granted permission to change their own IAM user password.

Which AWS services can the user use to change the password? (Choose two.)

A. AWS Command Line Interface (AWS CLI). ✅

B. AWS Key Management Sen/ice (AWS KMS)

C. AWS Management Console. ✅

D. AWS Resource Access Manager (AWS RAM)

E. AWS Secrets Manager

Question 484

Which task is the customer's responsibility, according to the AWS shared responsibility model?

A. Patch a guest operating system that is deployed on an Amazon EC2 instance. ✅

B. Control physical access to an AWS data center.

C. Control access to AWS underlying hardware.

D. Patch a host operating system that is deployed on Amazon S3.

Question 485

Which AWS service or feature provides a firewall at the subnet level within a VPC?

A. Security group

B. Network ACL. ✅

C. Elastic network interface

D. AWS WAF

Question 486

A company wants to use automated video analysis to identify employees that are accessing its offices.

Which AWS service will meet this requirement?

A. Amazon Rekognition. ✅

B. Amazon Polly

C. Amazon Cognito

D. AWS Lambda

Question 487

A company needs to host a web server on Amazon EC2 instances for at least 1 year. The web server cannot tolerate interruption.

Which EC2 instance purchasing option will meet these requirements MOST cost-effectively?

A. On-Demand Instances

B. Partial Upfront Reserved Instances. ✅

C. Spot Instances

D. No Upfront Reserved Instances

Question 488

Which guidelines are best practices for using AWS Identity and Access Management (IAM)? (Choose two.)

A. Share access keys.

B. Create individual IAM users. ✅

C. Use inline policies instead of customer managed policies.

D. Grant maximum privileges to IAM users.

E. Use groups to assign permissions to IAM users. ✅

Question 489

Which AWS service is always provided at no charge?

A. Amazon S3

B. AWS Identity and Access Management (IAM). ✅

C. Elastic Load Balancers

D. AWS WAF

Question 490

Which advantage of cloud computing allows users to scale resources up and down based on the amount of load that an application supports?

A. Go global in minutes

B. Stop guessing capacity. ✅

C. Benefit from massive economies of scale

D. Trade fixed expense for variable expense

Question 491

A company is requesting Payment Card Industry (PCI) reports that validate the operating effectiveness of AWS security controls.

How should the company obtain these reports?

A. Contact AWS Support.

B. **Download reports from AWS Artifact.** ✅

C. Download reports from AWS Security Hub.

D. Contact an AWS technical account manager (TAM).

Question 492

An ecommerce company wants to distribute traffic between the Amazon EC2 instances that host its website.

Which AWS service or resource will meet these requirements?

A. **Application Load Balancer** ✅

B. AWS WAF

C. AWS CloudHSM

D. AWS Direct Connect

Question 493

Which AWS services or features form the AWS Cloud global infrastructure? (Choose two.)

A. **Availability Zones** ✅

B. Amazon ElastiCache

C. **AWS Regions** ✅

D. Amazon S3

E. Amazon VPC

Question 494

According to the AWS shared responsibility model, which of the following are AWS responsibilities? (Choose two.)

A. **Network infrastructure and virtualization of infrastructure** ✅

B. Security of application data

C. Guest operating systems

D. **Physical security of hardware** ✅

E. Credentials and policies

Question 495

A company uses Amazon Aurora as its database service. The company wants to encrypt its databases and database backups.

Which party manages the encryption of the database clusters and database snapshots, according to the AWS shared responsibility model?

A. AWS

B. **The company** ✅

C. AWS Marketplace partners

D. Third-party partners

Question 496

A company is hosting a web application on Amazon EC2 instances. The company wants to implement custom conditions to filter and control inbound web traffic.

Which AWS service will meet these requirements?

A. Amazon GuardDuty

B. **AWS WAF** ✅

C. Amazon Macie

D. AWS Shield

Question 497

A company wants to maintain bandwidth throughput and provide a more consistent network experience than public internet-based connections.

Which AWS service should the company choose?

A. AWS VPN

B. **AWS Direct Connect** ✅

C. Amazon Connect

D. Amazon CloudFront

Question 498

A company has temporary workload that is also variable. The company needs to use Amazon EC2 instances for the workload. The EC2 instances need to handle short bursts of work that cannot stop before finishing.

Which purchase option will meet these requirements?

A. Spot Instances

B. **On-Demand Instances** ✅

C. Savings Plan

D. Reserved Instances

Question 499

A company's employees are working from home. The company wants its employees to use their personal devices to connect to a managed workstation in the AWS Cloud.

Which AWS service should the company use to provide the remote environment?

A. **Amazon WorkSpaces** ✅

B. AWS Cloud9

C. AWS Outposts

D. Amazon Lightsail

Question 500

To reduce costs, a company is planning to migrate a NoSQL database to AWS.

Which AWS service is fully managed and can automatically scale throughput capacity to meet database workload demands?

A. Amazon Redshift

B. Amazon Aurora

C. **Amazon DynamoDB** ✅

D. Amazon RDS

Question 501

A company needs to use SQL syntax to perform a direct query of objects in an Amazon S3 bucket.

Which AWS service can the company use to meet this requirement?

A. AWS Glue

B. **Amazon Athena** ✅

C. AWS Lambda

D. Amazon Kinesis

Question 502

A company uses Amazon RDS for a product database. The company wants to ensure the database is highly available.

Which feature of Amazon RDS will meet this requirement?

A. Read replicas

B. Blue/green deployment

C. **Multi-AZ deployment** ✅

D. Reserved Instances

Question 503

Which AWS service provides serverless compute for use with containers?

A. Amazon Simple Queue Service (Amazon SQS)

B. **AWS Fargate** ✅

C. AWS Elastic Beanstalk

D. Amazon SageMaker

Question 504

A company is using multiple AWS accounts for different business teams. The finance team wants to receive one bill for all of the company's accounts.

Which AWS service or tool should the finance team use to meet this requirement?

A. **AWS Organizations** ✅

B. AWS Trusted Advisor

C. Cost Explorer

D. AWS Budgets

Question 505

A company needs a firewall that will control network connections to and from a single Amazon EC2 instance. This firewall will not control network connections to and from other instances that are in the same subnet.

Which AWS service or feature can the company use to meet these requirements?

A. Network ACL

B. AWS WAF

C. Route table

D. **Security group** ✅

Question 506

A company is planning to use the Amazon EC2 instances as web servers. Customers from around the world will use the web servers. Most customers will use the web servers only during certain hours of the day.

How should the company deploy the EC2 instances to achieve the LOWEST operational cost?

A. In multiple Availability Zones

B. **In an Auto Scaling group** ✅

C. In a placement group

D. In private subnets

Question 507

Which benefit is always free of charge with AWS, regardless of a user's AWS Support plan?

A. AWS Developer Support

B. **AWS Developer Forums** ✅

C. Programmatic case management

D. AWS technical account manager (TAM)

Question 508

A company uses Amazon EC2 instances to run its application. The application needs to be available and running continuously for three or more years.

What type of EC2 instance should the company purchase for a discount on the EC2 pricing?

A. **Reserved Instances** ✅

B. Spot Instances

C. On-Demand Instances

D. EC2 Fleet

Question 509

A company needs to perform an audit of recent AWS account activity. The audit will investigate who initiated an event and what actions were performed.

Which AWS service should the company use to meet these requirements?

A. AWS Config

B. Amazon Rekognition

C. **AWS CloudTrail** ✅

D. Amazon Simple Notification Service (Amazon SNS)

Question 510

Which design principles are included in the reliability pillar of the AWS Well-Architected Framework? (Choose two.)

A. **Automatically recover from failure.** ✅

B. Grant everyone access to increase AWS service quotas.

C. **Stop guessing capacity.** ✅

D. Design applications to run in a single Availability Zone.

E. Plan to increase AWS service quotas first in a secondary AWS Region.

Question 511

A company is using Amazon DynamoDB.

Which task is the company's responsibility, according to the AWS shared responsibility model?

A. Patch the operating system.

B. Provision hosts.

C. **Manage database access permissions.** ✅

D. Secure the operating system.

Question 512

A company needs to use AWS technology to deploy a static website.

Which solution meets this requirement with the LEAST amount of operational overhead?

A. Deploy the website on Amazon EC2.

B. Host the website on AWS Elastic Beanstalk.

C. Deploy the website with Amazon Lightsail.

D. **Host the website on Amazon S3.** ✅

Question 513

Which recommendation can AWS Cost Explorer provide to help reduce cost?

A. Use a specific database engine.

B. Change the programming language for an application.

C. Deploy a specific operating system.

D. **Terminate an idle instance.** ✅

Question 514

A company wants to deploy an application in multiple Availability Zones in a single AWS Region.

Which benefit will this deployment provide to the company?

A. Improved connection performance for global customers

B. **Resilient architecture and a highly available solution** ✅

C. Reduced overall data storage costs

D. Ability to shut down an Availability Zone during periods of low demand

---

Question 515

Which AWS service can companies use to subscribe to RSS feeds for updates about all AWS service issues?

A. Amazon Simple Notification Service (Amazon SNS)

B. **AWS Health Dashboard** ✅

C. AWS Config

D. AWS CodeCommit

Question 516

Which Amazon EC2 Reserved Instances term commitment will give users the MOST cost savings?

A. 1 year

B. 2 years

C. **3 years** ✅

D. 5 years

Question 517

A company is running big data analytics and massive parallel computations on its AWS test and development servers. The company can tolerate occasional downtime.

What is the MOST cost-effective Amazon EC2 purchasing option for the company to use?

A. On-Demand Instances

B. **Spot Instances** ✅

C. Reserved Instances

D. Savings Plans

Question 518

A company runs Amazon EC2 instances in a research lab. The instances run for 3 hours each week and cannot be interrupted.

What is the MOST cost-effective instance purchasing option to meet these requirements?

A. Compute Savings Plan

B. **On-Demand Instances** ✅

C. Convertible Reserved Instances

D. Spot Instances

Question 519

A new AWS user needs to interact with AWS Support by using API calls.

Which AWS Support plan will meet this requirement MOST cost-effectively?

A. AWS Basic Support

B. **AWS Developer Support** ✅

C. AWS Business Support

D. AWS Enterprise Support

Question 520

A company migrated to the AWS Cloud. Now the company pays for services on an as-needed basis.

Which advantage of cloud computing is the company benefiting from?

A. Stop spending money running and maintaining data centers

B. Increase speed and agility

C. Go global in minutes

D. **Trade fixed expense for variable expense** ✅

Question 521

A company will run a predictable compute workload on Amazon EC2 instances for the next 3 years. The workload is critical for the company. The company wants to optimize costs to run the workload.

Which solution will meet these requirements?

A. Spot Instances

B. Dedicated Hosts

C. **Savings Plans** ✅

D. On-Demand Instances

Question 522

A company has a test AWS environment. A company is planning on testing an application within AWS. The application testing can be interrupted and does not need to run continuously.

Which Amazon EC2 purchasing option will meet these requirements MOST cost-effectively?

A. On-Demand Instances

B. Dedicated Instances

C. **Spot Instances** ✅

D. Reserved Instances

Question 523

A company wants to estimate the cost for its AWS architecture solution before migration.

Which AWS service or feature will meet this requirement?

A. Amazon Detective

B. AWS Budgets

C. AWS Resource Explorer

D. **AWS Pricing Calculator** ✅

Question 524

A company wants to centrally manage its employee's access to multiple AWS accounts.

Which AWS service or feature should the company use to meet this requirement?

A. AWS Identity and Access Management Access Analyzer

B. AWS Secrets Manager

C. **AWS IAM Identity Center** ✅

D. AWS Security Token Service (AWS STS)

Question 525

A university receives a grant to conduct research by using AWS services. The research team needs to make sure the grant money lasts for the entire school year. The team has decided on a monthly allocation that adds up to the total grant amount.

Which AWS service or feature will notify the team if spending exceeds the planned amount?

A. **AWS Budgets** ✅

B. Cost Explorer

C. Cost allocation tags

D. Cost categories

Question 526

A company has migrated its workload to the AWS Cloud. The company wants to optimize existing Amazon EC2 resources.

Which AWS services or tools provide this functionality? (Choose two.)

A. AWS Elastic Beanstalk

B. **AWS Cost Explorer** ✅

C. Amazon Detective

D. **AWS Compute Optimizer** ✅

E. AWS Billing Conductor

Question 527

A company with multiple accounts and teams wants to set up a new multi-account AWS environment.

Which AWS service supports this requirement?

A. AWS CloudFormation

B. **AWS Control Tower** ✅

C. AWS Config

D. Amazon Virtual Private Cloud (Amazon VPC)

Question 528

A company needs access to checks and recommendations that help the company follow AWS best practices for cost optimization, security, fault tolerance, performance, and service quotas.

Which combination of an AWS service and AWS Support plan on the AWS account will meet these requirements?

A. AWS Trusted Advisor with AWS Developer Support

B. AWS Health Dashboard with AWS Enterprise Support

C. **AWS Trusted Advisor with AWS Business Support** ✅

D. AWS Health Dashboard with AWS Enterprise On-Ramp Support

Question 529

Which AWS service helps users plan and track their server and application inventory migration data to AWS?

A. Amazon CloudWatch

B. AWS DataSync

C. **AWS Migration Hub** ✅

D. AWS Application Migration Service

Question 530

Which AWS team or offering helps users accelerate cloud adoption through paid engagements in any of several specialty practice areas?

A. AWS Enterprise Support

B. AWS solutions architects

C. **AWS Professional Services** ✅

D. AWS account managers

Question 531

A company needs to purchase Amazon EC2 instances to support an application that will run continuously for more than 1 year.

Which EC2 instance purchasing option meets these requirements MOST cost-effectively?

A. Dedicated Instances

B. Spot Instances

C. **Reserved Instances** ✅

D. On-Demand Instances

Question 532

Which programming languages does AWS Cloud Development Kit (AWS CDK) currently support? (Choose two.)

A. **Python** ✅

B. Swift

C. **TypeScript** ✅

D. Ruby

E. PHP

Question 533

Which AWS service gives users the ability to discover and protect sensitive data that is stored in Amazon S3 buckets?

A. **Amazon Macie** ✅

B. Amazon Detective

C. Amazon GuardDuty

D. AWS IAM Access Analyzer

Question 534

Which AWS service or feature gives users the ability to provision AWS infrastructure programmatically?

A. **AWS Cloud Development Kit (AWS CDK)** ✅

B. Amazon CodeGuru

C. AWS Config

D. AWS CodeCommit

Question 535

Which AWS service or feature allows a company to have its own logically isolated section of the AWS Cloud?

A. AWS VPN

B. Availability Zones

C. **Amazon Virtual Private Cloud (Amazon VPC)** ✅

D. AWS Regions
