Question 536

Which of the following actions are controlled with AWS Identity and Access Management (IAM)? (Choose two.)

A. Control access to AWS service APIs and to other specific resources. ✅
B. Provide intelligent threat detection and continuous monitoring.
C. Protect the AWS environment using multi-factor authentication (MFA). ✅
D. Grant users access to AWS data centers.
E. Provide firewall protection for applications from common web attacks.

Question 537

Why are AWS CloudFormation templates used?

A. To reduce provisioning time by using automation. ✅
B. To transfer existing infrastructure to another company.
C. To reuse on-premises infrastructure in the AWS Cloud.
D. To deploy large infrastructure with no cost implications.

Question 538

A company is using AWS Identity and Access Management (IAM).

Who can manage the access keys of the AWS account root user?

A. IAM users in the same account that have been granted permission
B. IAM roles in any account that have been granted permission
C. IAM users and roles that have been granted permission
D. The AWS account owner ✅

Question 539

Which group shares responsibility with AWS for security and compliance of AWS accounts and resources?

A. Third-party vendors
B. Customers ✅
C. Reseller partners
D. Internet providers

Question 540

A company needs an event history of which AWS resources the company has created.

Which AWS service will provide this information?

A. Amazon CloudWatch
B. AWS CloudTrail ✅
C. Amazon Aurora
D. Amazon EventBridge

Question 541

A company wants to run relationship databases in the AWS Cloud. The company wants to use a managed service that will install the database and run regular software updates.

Which AWS service will meet these requirements?

A. Amazon S3
B. Amazon RDS ✅
C. Amazon Elastic Block Store (Amazon EBS)
D. Amazon DynamoDB

Question 542

Which AWS service provides a fully managed graph database for highly connected datasets?

A. Amazon DynamoDB
B. Amazon RDS
C. Amazon Neptune ✅
D. Amazon Aurora

Question 543

A company's cloud environment includes Amazon EC2 instances and Application Load Balancers. The company wants to improve protections for its cloud

resources against DDoS attacks. The company also wants to have real-time visibility into any DDoS attacks.

Which AWS service will meet these requirements?

A. AWS Shield Standard
B. AWS Firewall Manager
C. AWS Shield Advanced ✅
D. Amazon GuardDuty

Question 544

Which of the following services can be used to block network traffic to an instance? (Choose two.)

A. Security groups ✅
B. Amazon Virtual Private Cloud (Amazon VPC) flow logs
C. Network ACLs ✅
D. Amazon CloudWatch
E. AWS CloudTrail

Question 545

A company wants to update its online data processing application by implementing container-based services that run for 4 hours at a time. The company does not want to provision or manage server instances.

Which AWS service will meet these requirements?

A. AWS Lambda
B. AWS Fargate ✅
C. Amazon EC2
D. AWS Elastic Beanstalk

Question 546

Which AWS service enables users to create copies of resources across AWS Regions?

A. Amazon ElastiCache
B. AWS CloudFormation ✅
C. AWS CloudTrail
D. AWS Systems Manager

Question 547

Which task is the responsibility of AWS, according to the AWS shared responsibility model?

A. Apply guest operating system patches to Amazon EC2 instances.
B. Provide monitoring of human resources information management (HRIM) systems.
C. Perform automated backups of Amazon RDS instances. ✅
D. Optimize the costs of running AWS services.

Question 548

A user needs to perform a one-time backup of an Amazon Elastic Block Store (Amazon EBS) volume that is attached to an Amazon EC2 instance.

What is the MOST operationally efficient way to perform this backup?

A. Attach another EBS volume to the EC2 instance, and copy the contents.
B. Copy the EBS volume to a server that is running outside AWS and is connected with AWS Direct Connect.
C. Create an EBS snapshot of the volume. ✅
D. Create a custom script to copy the EBS file contents to Amazon S3.

Question 549

A developer who has no AWS Cloud experience wants to use AWS technology to build a web application.

Which AWS service should the developer use to start building the application?

A. Amazon SageMaker
B. AWS Lambda
C. Amazon Lightsail ✅
D. Amazon Elastic Container Service (Amazon ECS)

Question 550

A company wants to manage access and permissions for its third-party software as a service (SaaS) applications. The company wants to use a portal where end users can access assigned AWS accounts and AWS Cloud applications.

Which AWS service should the company use to meet these requirements?

A. Amazon Cognito
B. AWS IAM Identity Center (AWS Single Sign-On) ✅
C. AWS Identity and Access Management (IAM)
D. AWS Directory Service for Microsoft Active Directory

Question 551

Which AWS service is designed for users running workloads that include a NoSQL database?

A. Amazon RDS
B. Amazon S3
C. Amazon Redshift
D. Amazon DynamoDB ✅

Question 552

A company has a website on AWS. The company wants to deliver the website to a worldwide audience and provide low-latency response times for global users.

Which AWS service will meet these requirements?

A. AWS CloudFormation
B. Amazon CloudFront ✅
C. Amazon ElastiCache
D. Amazon DynamoDB

Question 553

A company wants to add a conversational chatbot to its website.

Which AWS service can the company use to meet this requirement?

A. Amazon Textract
B. Amazon Lex ✅
C. AWS Glue
D. Amazon Rekognition

Question 554

Which AWS service or feature can be used to monitor for potential disk write spikes on a system that is running on Amazon EC2?

A. AWS CloudTrail
B. AWS Health Dashboard
C. AWS Trusted Advisor
D. Amazon CloudWatch ✅

Question 555

Which option is a perspective that includes foundational capabilities of the AWS Cloud Adoption Framework (AWS CAF)?

A. Sustainability
B. Performance efficiency
C. Governance ✅
D. Reliability

Question 556

Which AWS service can identify when an Amazon EC2 instance was terminated?

A. AWS Identity and Access Management (IAM)
B. AWS CloudTrail ✅
C. AWS Compute Optimizer
D. Amazon EventBridge

Question 557

A company has applications that control on-premises factory equipment.

Which AWS service should the company use to run these applications with the LEAST latency?

A. AWS Outposts ✅
B. Amazon EC2
C. AWS Lambda
D. AWS Fargate

Question 558

Which AWS Cloud Adoption Framework (AWS CAF) perspective focuses on organizing an inventory of data products in a data catalog?

A. Operations
B. Governance ✅
C. Business
D. Platform

Question 559

A company runs its production workload in the AWS Cloud. The company needs to choose one of the AWS Support Plans.

Which of the AWS Support Plans will meet these requirements at the LOWEST cost?

A. Developer
B. Enterprise On-Ramp
C. Enterprise
D. Business ✅

Question 560

What is the primary use case for Amazon GuardDuty?

A. Prevention of DDoS attacks
B. Protection against SQL injection attacks
C. Automatic monitoring for threats to AWS workloads ✅
D. Automatic provisioning of AWS resources

Question 561

Which VPC component can a company use to set up a virtual firewall at the Amazon EC2 instance level?

A. Network ACL
B. Security group ✅
C. Route table
D. NAT gateway

Question 562

A developer needs to interact with AWS by using the AWS CLI.

Which security feature or AWS service must be provisioned in the developer's account to meet this requirement?

A. User name and password
B. AWS Systems Manager
C. Root password access
D. AWS access key ✅

Question 563

A food delivery company needs to block users in certain countries from accessing its website.

Which AWS service should the company use to meet this requirement?

A. AWS WAF ✅
B. AWS Control Tower
C. Amazon Fraud Detector
D. Amazon Pinpoint

Question 564

A company needs to use Amazon S3 to store audio files that are each 5 megabytes in size. The company will rarely access the files, but the company must be able to retrieve the files immediately.

Which S3 storage class will meet these requirements MOST cost-effectively?

A. S3 Standard
B. S3 Standard-Infrequent Access (S3 Standard-IA) ✅
C. S3 Glacier Flexible Retrieval
D. S3 Glacier Deep Archive

Question 565

A company wants to set up a secure network connection from on premises to the AWS Cloud within 1 week.

Which solution will meet these requirements?

A. AWS Direct Connect
B. Amazon VPC
C. AWS Site-to-Site VPN ✅
D. Edge location

Question 566

What is a customer responsibility under the AWS shared responsibility model when using AWS Lambda?

A. Maintenance of the underlying Lambda hardware.
B. Maintenance of the Lambda networking infrastructure.
C. The code and libraries that run in the Lambda functions. ✅
D. The Lambda server software.

Question 567

Which of the following is a fully managed MySQL-compatible database?

A. Amazon S3
B. Amazon DynamoDB
C. Amazon Redshift
D. Amazon Aurora ✅

Question 568

Which tasks are the responsibility of AWS according to the AWS shared responsibility model? (Choose two.)

A. Configure AWS Identity and Access Management (IAM).
B. Configure security groups on Amazon EC2 instances.
C. Secure the access of physical AWS facilities. ✅
D. Patch applications that run on Amazon EC2 instances.
E. Perform infrastructure patching and maintenance. ✅

Question 569

A company's compliance officer wants to review the AWS Service Organization Control (SOC) reports.

Which AWS service or feature should the compliance officer use to complete this task?

A. AWS Artifact ✅
B. AWS Concierge Support
C. AWS Support
D. AWS Trusted Advisor

Question 570

A company has a compliance requirement to record and evaluate configuration changes, as well as perform remediation actions on AWS resources.

Which AWS service should the company use?

A. AWS Config ✅
B. AWS Secrets Manager
C. AWS CloudTrail
D. AWS Trusted Advisor

Question 571

A company plans to perform a one-time migration of a large dataset with millions of files from its on-premises data center to the AWS Cloud.

Which AWS service should the company use for the migration?

A. AWS Database Migration Service (AWS DMS)
B. AWS DataSync ✅
C. AWS Migration Hub
D. AWS Application Migration Service

Question 572

Which AWS network services or features allow CIDR block notation when providing an IP address range? (Choose two.)

A. Security groups ✅
B. Amazon Machine Image (AMI)
C. Network access control list (network ACL) ✅
D. AWS Budgets
E. Amazon Elastic Block Store (Amazon EBS)

Question 573

A company wants to develop an accessibility application that will convert text into audible speech.

Which AWS service will meet this requirement?

A. Amazon MQ
B. Amazon Polly ✅
C. Amazon Neptune
D. Amazon Timestream

Question 574

A company needs to set up dedicated network connectivity between its on-premises data center and the AWS Cloud. The network cannot use the public internet.

Which AWS service or feature will meet these requirements?

A. AWS Transit Gateway
B. AWS VPN
C. Amazon CloudFront
D. AWS Direct Connect ✅

Question 575

A company needs to use dashboards and charts to analyze insights from business data.

Which AWS service will provide the dashboards and charts for these insights?

A. Amazon Macie
B. Amazon Aurora
C. Amazon QuickSight ✅
D. AWS CloudTrail

Question 576

A company wants to migrate its on-premises infrastructure to the AWS Cloud.

Which advantage of cloud computing will help the company reduce upfront costs?

A. Go global in minutes
B. Increase speed and agility
C. Benefit from massive economies of scale
D. Trade fixed expense for variable expense ✅

Question 577

A company is designing workloads in the AWS Cloud. The company wants the workloads to perform their intended function correctly and consistently throughout their lifecycle.

Which pillar of the AWS Well-Architected Framework does this goal represent?

A. Operational excellence
B. Security
C. Reliability ✅
D. Performance efficiency

Question 578

Which AWS service supports a hybrid architecture that gives users the ability to extend AWS infrastructure, AWS services, APIs, and tools to data centers, co-location environments, or on-premises facilities?

A. AWS Snowmobile
B. AWS Local Zones
C. AWS Outposts ✅
D. AWS Fargate

Question 579

Which AWS service is used to temporarily provide federated security credentials to access AWS resources?

A. Amazon GuardDuty
B. AWS Simple Token Service (AWS STS) ✅
C. AWS Secrets Manager
D. AWS Certificate Manager

Question 580

What is a benefit of using an Elastic Load Balancing (ELB) load balancer with applications running in the AWS Cloud?

A. An ELB will automatically scale resources to meet capacity needs.
B. An ELB can balance traffic across multiple compute resources. ✅
C. An ELB can span multiple AWS Regions.
D. An ELB can balance traffic between multiple internet gateways.

Question 581

A company needs to convert video files and audio files to a format that will play on smartphones.

Which AWS service will meet this requirement?

A. Amazon Comprehend
B. Amazon Rekognition
C. Amazon Elastic Transcoder ✅
D. Amazon Polly

Question 582

A company wants to securely store Amazon RDS database credentials and automatically rotate user passwords periodically.

Which AWS service or capability will meet these requirements?

A. Amazon S3
B. AWS Systems Manager Parameter Store
C. AWS Secrets Manager ✅
D. AWS CloudTrail

Question 583

A company needs to have the ability to set up infrastructure for new applications in minutes.

Which advantage of cloud computing will help the company meet this requirement?

A. Trade fixed expense for variable expense
B. Go global in minutes
C. Increase speed and agility ✅
D. Stop guessing capacity

Question 584

A company needs a managed NFS file system that the company can use with its AWS compute resources.

Which AWS service or feature will meet these requirements?

A. Amazon Elastic Block Store (Amazon EBS)
B. AWS Storage Gateway Tape Gateway
C. Amazon S3 Glacier Flexible Retrieval
D. Amazon Elastic File System (Amazon EFS) ✅

Question 585

A company plans to migrate to the AWS Cloud. The company wants to gather information about its on-premises data center.

Which AWS service should the company use to meet these requirements?

A. AWS Application Discovery Service ✅
B. AWS DataSync
C. AWS Storage Gateway
D. AWS Database Migration Service (AWS DMS)

Question 586

Which tasks are responsibilities of the customer, according to the AWS shared responsibility model? (Choose two.)

A. Secure the virtualization layer.
B. Encrypt data and maintain data integrity. ✅
C. Patch the Amazon RDS operating system.
D. Maintain identity and access management controls. ✅
E. Secure Availability Zones.

Question 587

An online retail company wants to migrate its on-premises workload to AWS. The company needs to automatically handle a seasonal workload increase in a cost-effective manner.

Which AWS Cloud features will help the company meet this requirement? (Choose two.)

A. Cross-Region workload deployment
B. Pay-as-you-go pricing. ✅
C. Built-in AWS CloudTrail audit capabilities
D. Auto Scaling policies. ✅
E. Centralized logging

Question 588

A developer needs to use a standardized template to create copies of a company's AWS architecture for development, test, and production environments.

Which AWS service should the developer use to meet this requirement?

A. AWS Cloud Map
B. AWS CloudFormation. ✅
C. Amazon Cloud Front
D. AWS CloudTrail

Question 589

Which AWS service can run a managed PostgreSQL database that provides online transaction processing (OLTP)?

A. Amazon DynamoDB
B. Amazon Athena
C. Amazon RDS. ✅
D. Amazon EMR

Question 590

Which AWS service can create a private network connection from on premises to the AWS Cloud?

A. AWS Config
B. Virtual Private Cloud (Amazon VPC)
C. AWS Direct Connect. ✅
D. Amazon Route 53

Question 591

Under the AWS shared responsibility model, which of the following is a responsibility of the customer?

A. Shred disk drives before they leave a data center.
B. Prevent customers from gathering packets or collecting traffic at the hypervisor level.

C. Patch the guest operating system with the latest security patches. ✅
D. Maintain security systems that provide physical monitoring of data centers.

Question 592

Which AWS service uses speech-to-text conversion to help users create meeting notes?

A. Amazon Polly
B. Amazon Textract
C. Amazon Rekognition
D. Amazon Transcribe ✅

Question 593

Which AWS service or tool provides users with a graphical interface that they can use to manage AWS services?

A. AWS Copilot
B. AWS CLI
C. AWS Management Console ✅
D. AWS software development kits (SDKs)

Question 594

A company has a workload that will run continuously for 1 year. The workload cannot tolerate service interruptions.

Which Amazon EC2 purchasing option will be MOST cost-effective?

A. All Upfront Reserved Instances ✅
B. Partial Upfront Reserved Instances
C. Dedicated Instances
D. On-Demand Instances

Question 595

A company migrated its systems to the AWS Cloud. The systems are rightsized, and a security review did not reveal any issues. The company must ensure that

additional developments, integrations, changes, and system usage growth do not jeopardize this optimized AWS infrastructure.

Which AWS service should the company use to report ongoing optimization and security?

A. AWS Trusted Advisor ✅
B. AWS Health Dashboard
C. Amazon Connect
D. AWS Systems Manager

Question 596

Which AWS service integrates with other AWS services to provide the ability to encrypt data at rest?

A. AWS Key Management Service (AWS KMS) ✅
B. AWS Certificate Manager (ACM)
C. AWS Identity and Access Management (IAM)
D. AWS Security Hub

Question 597

A company wants to track the monthly cost and usage of all Amazon EC2 instances in a specific AWS environment.

Which AWS service or tool will meet these requirements?

A. AWS Cost Anomaly Detection
B. AWS Budgets ✅
C. AWS Compute Optimizer
D. AWS Trusted Advisor

Question 598

A company wants the ability to automatically acquire resources as needed and release the resources when they are no longer needed.

Which cloud concept describes this functionality?

A. Availability
B. Elasticity ✅
C. Durability
D. Reliability

Question 599

A company wants a cost-effective option when running its applications in an Amazon EC2 instance for short time periods. The applications can be interrupted.

Which EC2 instance type will meet these requirements?

A. Spot Instances ✅
B. On-Demand Instances
C. Reserved Instances
D. Dedicated Instances

Question 600

A company wants to provide managed Windows virtual desktops and applications to its remote employees over secure network connections.

Which AWS services can the company use to meet these requirements? (Choose two.)

A. Amazon Connect
B. Amazon AppStream 2.0 ✅
C. Amazon WorkSpaces ✅
D. AWS Site-to-Site VPN
E. Amazon Elastic Container Service (Amazon ECS)

Question 601

A company has an AWS Business Support plan. The company needs to gain access to the AWS DDoS Response Team (DRT) to help mitigate DDoS events.

Which AWS service or resource must the company use to meet these requirements?

A. AWS Shield Standard
B. AWS Enterprise Support
C. AWS WAF
D. AWS Shield Advanced ✅

Question 602

Which AWS service or tool provides a visualization of historical AWS spending patterns and projections of future AWS costs?

A. AWS Cost and Usage Report
B. AWS Budgets
C. Cost Explorer ✅
D. Amazon Cloud Watch

Question 603

A company is migrating to the AWS Cloud instead of running its infrastructure on premises.

Which of the following are advantages of this migration? (Choose two.)

A. Elimination of the need to perform security auditing
B. Increased global reach and agility ✅
C. Ability to deploy globally in minutes ✅
D. Elimination of the cost of IT staff members
E. Redundancy by default for all compute services

Question 604

Which AWS service uses edge locations to cache content?

A. Amazon Kinesis
B. Amazon Simple Queue Service (Amazon SQS)
C. Amazon CloudFront ✅
D. Amazon Route 53

Question 605

A company wants to securely access an Amazon S3 bucket from an Amazon EC2 instance without accessing the internet.

What should the company use to accomplish this goal?

A. VPN connection
B. Internet gateway
C. VPC endpoint ✅
D. NAT gateway

Question 606

A company wants an AWS service that can automate software deployment in Amazon EC2 instances and on-premises instances.

Which AWS service will meet this requirement?

A. AWS CodeCommit
B. AWS CodeBuild
C. AWS CodeDeploy ✅
D. AWS CodePipeline

Question 607

Which AWS services are serverless? (Choose two.)

A. AWS Fargate ✅
B. Amazon Managed Streaming for Apache Kafka
C. Amazon EMR
D. Amazon S3 ✅
E. Amazon EC2

Question 608

A company wants to continuously improve processes and procedures to deliver business value.

Which pillar of the AWS Well-Architected Framework does this goal represent?

A. Performance efficiency
B. Operational excellence ✅

C. Reliability
D. Sustainability

Question 609

Which of the following is a customer responsibility according to the AWS shared responsibility model?

A. Apply security patches for Amazon S3 infrastructure devices.
B. Provide physical security for AWS datacenters.
C. Install operating system updates on Lambda@Edge.
D. Implement multi-factor authentication (MFA) for IAM user accounts. ✅

Question 610

Which AWS service should a company use to organize, characterize, and search large numbers of images?

A. Amazon Transcribe
B. Amazon Rekognition ✅
C. Amazon Aurora
D. Amazon QuickSight

Question 611

A company wants to monitor for misconfigured security groups that are allowing unrestricted access to specific ports.

Which AWS service will meet this requirement?

A. AWS Trusted Advisor ✅
B. Amazon CloudWatch
C. Amazon GuardDuty
D. AWS Health Dashboard

Question 612

Which AWS service is always available free of charge to users?

A. Amazon Athena
B. AWS Identity and Access Management (IAM) ✅
C. AWS Secrets Manager
D. Amazon ElastiCache

Question 613

A company needs to run some of its workloads on premises to comply with regulatory guidelines. The company wants to use the AWS Cloud to run workloads that are not required to be on premises. The company also wants to be able to use the same API calls for the on-premises workloads and the cloud workloads.

Which AWS service or feature should the company use to meet these requirements?

A. Dedicated Hosts
B. AWS Outposts ✅
C. Availability Zones
D. AWS Wavelength

Question 614

What is the recommended use case for Amazon EC2 On-Demand Instances?

A. A steady-state workload that requires a particular EC2 instance configuration for a long period of time
B. A workload that can be interrupted for a project that requires the lowest possible cost
C. An unpredictable workload that does not require a long-term commitment ✅
D. A workload that is expected to run for longer than 1 year

Question 615

A company wants to use an AWS networking solution that can act as a centralized gateway between multiple VPCs and on-premises networks.

Which AWS service or feature will meet this requirement?

A. Gateway VPC endpoint
B. AWS Direct Connect
C. AWS Transit Gateway ✅
D. AWS PrivateLink

Question 616

An administrator observed that multiple AWS resources were deleted yesterday.

Which AWS service will help identify the cause and determine which user deleted the resources?

A. AWS CloudTrail ✅
B. Amazon Inspector
C. Amazon GuardDuty
D. AWS Trusted Advisor

Question 617

To assist companies with Payment Card Industry Data Security Standard (PCI DSS) compliance in the cloud, AWS provides:

A. physical Inspections of data centers by appointment.
B. required PCI compliance certifications for any application running on AWS.
C. an AWS Attestation of Compliance (AOC) report for specific AWS services. ✅
D. professional PCI compliance services.

Question 618

In which situations should a company create an IAM user instead of an IAM role?

A. When an application that runs on Amazon EC2 instances requires access to other AWS services
B. When the company creates AWS access credentials for individuals ✅
C. When the company creates an application that runs on a mobile phone that makes requests to AWS
D. When the company needs to add users to IAM groups ✅
E. When users are authenticated in the corporate network and want to be able to use AWS without having to sign in a second time

---

Question 619

A company hosts a web application on AWS. The company has improved the availability of its application by provisioning multiple Amazon EC2 instances. The company wants to distribute its traffic across the EC2 instances while providing a single point of contact to the web clients.

Which AWS service can distribute the traffic to multiple EC2 instances as targets?

A. VPC endpoints
B. Application Load Balancer ✅
C. NAT gateway
D. Internet gateway

Question 620

What is the total volume of data that can be stored in Amazon S3?

A. 10 PB
B. 50 PB
C. 100 PB
D. Virtually unlimited ✅

Question 621

Which design principle is related to the reliability pillar according to the AWS Well-Architected Framework?

A. Test recovery procedures ✅
B. Experiment more often
C. Go global in minutes
D. Analyze and attribute to expenditure

Question 622

Which AWS service is a key-value database that provides sub-millisecond latency on a large scale?

A. Amazon DynamoDB ✅
B. Amazon Aurora
C. Amazon DocumentDB (with MongoDB compatibility)
D. Amazon Neptune

Question 623

A company stores data in an Amazon S3 bucket.

Which task is the responsibility of AWS?

A. Configure an S3 Lifecycle policy.
B. Activate S3 Versioning.
C. Configure S3 bucket policies.
D. Protect the infrastructure that supports S3 storage. ✅

Question 624

A company wants to transfer a virtual Windows Server 2022 that is currently running in its own data center to AWS. The company wants to automatically convert the existing server to run directly on AWS infrastructure instead of visualized hardware.

Which AWS service will meet these requirements?

A. AWS DataSync
B. AWS Database Migration Service (AWS DMS)
C. AWS Application Discovery Service
D. AWS Application Migration Service ✅

Question 625

Which AWS service is a fully managed NoSQL database service?

A. Amazon RDS
B. Amazon Redshift
C. Amazon DynamoDB ✅
D. Amazon Aurora

Question 626

A company deployed an application in multiple AWS Regions around the world. The company wants to improve the application's performance and availability.

Which AWS service will meet these requirements?

A. AWS Global Accelerator ✅
B. Amazon DataZone
C. AWS Cloud Map
D. AWS Auto Scaling

Question 627

A company wants to migrate its on-premises SQL Server database to the AWS Cloud. The company wants AWS to handle the day-to-day administration of the database.

Which AWS service will meet the company's requirements?

A. Amazon EC2 for Microsoft SQL Server
B. Amazon DynamoDB
C. Amazon RDS ✅
D. Amazon Aurora

Question 628

A company needs stateless network filtering for its VPC.

Which AWS service, tool, or feature will meet this requirement?

A. AWS PrivateLink
B. Security group
C. Network access control list (ACL) ✅
D. AWS WAF

Question 629

Which option is an advantage of AWS Cloud computing that minimizes variable costs?

A. High availability
B. Economies of scale ✅
C. Global reach
D. Agility

Question 630

A company wants to migrate its server-based applications to the AWS Cloud. The company wants to determine the total cost of ownership for its compute resources that will be hosted on the AWS Cloud.

Which combination of AWS services or tools will meet these requirements? (Choose two.)

A. AWS Pricing Calculator ✅
B. Migration Evaluator ✅
C. AWS Support Center
D. AWS Application Discovery Service
E. AWS Database Migration Service (AWS DMS)

Question 631

A company has data lakes designed for high performance computing (HPC) workloads.

Which Amazon EC2 instance type should the company use to meet these requirements?

A. General purpose instances
B. Compute optimized instances ✅
C. Memory optimized instances
D. Storage optimized instances

Question 632

Which benefits does a company gain when the company moves from on-premises IT architecture to the AWS Cloud? (Choose two.)

A. Reduced or eliminated tasks for hardware troubleshooting, capacity planning, and procurement ✅

B. Elimination of the need for trained IT staff
C. Automatic security configuration of all applications that are migrated to the cloud
D. Elimination of the need for disaster recovery planning
E. Faster deployment of new features and applications ✅

Question 633

A company is deploying a machine learning (ML) research project that will require a lot of compute power over several months. The ML processing jobs do not need to run at specific times.

Which Amazon EC2 instance purchasing option will meet these requirements at the lowest cost?

A. On-Demand Instances
B. Spot Instances ✅
C. Reserved Instances
D. Dedicated Instances

Question 634

A company is planning to migrate to the AWS Cloud. The company is conducting organizational transformation and wants to become more responsive to customer inquiries and feedback.

Which task should the company perform to meet these requirements, according to the AWS Cloud Adoption Framework (AWS CAF)? (Choose two.)

A. Realign teams to focus on products and value streams. ✅
B. Create new value propositions with new products and services.
C. Use agile methods to rapidly iterate and evolve. ✅
D. Use a new data and analytics platform to create actionable insights.
E. Migrate and modernize legacy infrastructure.

Question 635

A company that is planning to migrate to the AWS Cloud is based in an isolated area that has limited internet connectivity. The company needs to perform local

data processing on premises. The company needs a solution that can operate without a stable internet connection.

Which AWS service will meet these requirements?

A. Amazon S3
B. AWS Snowball Edge ✅
C. AWS Storage Gateway
D. AWS Backup

Question 636

A company wants to build graph queries for real-time fraud pattern detection.

Which AWS service will meet this requirement?

A. Amazon Neptune ✅
B. Amazon DynamoDB
C. Amazon Timestream
D. Amazon Forecast

Question 637

A company wants to migrate to the AWS Cloud. The company needs the ability to acquire resources when the resources are necessary. The company also needs the ability to release those resources when the resources are no longer necessary.

Which architecture concept of the AWS Cloud meets these requirements?

A. Elasticity ✅
B. Availability
C. Reliability
D. Durability

Question 638

A company wants to deploy a web application as a containerized application. The company wants to use a managed service that can automatically create container images from source code and deploy the containerized application.

Which AWS service will meet these requirements?

A. AWS Elastic Beanstalk
B. Amazon Elastic Container Service (Amazon ECS)
C. AWS App Runner ✅
D. Amazon EC2

Question 639

A company has moved all its infrastructure to the AWS Cloud. To plan ahead for each quarter, the finance team wants to track the cost and usage data of all resources from previous months. The finance team wants to automatically generate reports that contains the data.

Which AWS service or feature should the finance team use to meet these requirements?

A. Amazon Detective
B. AWS Pricing Calculator
C. AWS Budgets ✅
D. AWS Savings Plans

Question 640

Which AWS Cloud Adoption Framework (AWS CAF) perspective focuses on real-time insights and answers questions about strategy?

A. Operations
B. People
C. Business ✅
D. Platform

Question 641

A company wants to migrate critical on-premises production systems to Amazon EC2 instances. The production instances will be used for at least 3 years. The company wants a pricing option that will minimize cost.

Which solution will meet these requirements?

A. On-Demand Instances
B. Reserved Instances ✅
C. Spot Instances
D. AWS Free Tier

Question 642

Which AWS Well-Architected Framework concept represents a system's ability to remain functional when the system encounters operational problems?

A. Consistency
B. Elasticity
C. Durability ✅
D. Latency

Question 643

Which pillar of the AWS Well-Architected Framework focuses on the ability to recover automatically from service interruptions?

A. Security
B. Performance efficiency
C. Operational excellence
D. Reliability ✅

Question 644

Which AWS services or features provide disaster recovery solutions for Amazon EC2 instances? (Choose two.)

A. EC2 Reserved Instances
B. EC2 Amazon Machine Images (AMIs) ✅
C. Amazon Elastic Block Store (Amazon EBS) snapshots ✅
D. AWS Shield
E. Amazon GuardDuty

Question 645

A company has multiple SQL-based databases located in a data center. The company needs to migrate all database servers to the AWS Cloud to reduce the cost of operating physical servers.

Which AWS service or resource will meet these requirements with the LEAST operational overhead?

A. Amazon EC2 instances
B. Amazon RDS ✅
C. Amazon DynamoDB
D. OpenSearch

Question 646

A company wants to build, train, and deploy machine learning (ML) models.

Which AWS service can the company use to meet this requirement?

A. Amazon Personalize
B. Amazon Comprehend
C. Amazon Forecast
D. Amazon SageMaker ✅

Question 647

Which AWS service or tool provides recommendations to help users get rightsized Amazon EC2 instances based on historical workload usage data?

A. AWS Pricing Calculator
B. AWS Compute Optimizer ✅
C. AWS App Runner
D. AWS Systems Manager

Question 648

A company wants to explore and analyze data in Amazon S3 by using a programming language.

Which AWS service will meet these requirements?

A. Amazon Kendra
B. Amazon Athena ✅
C. Amazon Comprehend
D. Amazon SageMaker

Question 649

A company needs to run an application on Amazon EC2 instances without interruption.

Which EC2 instance purchasing option will meet this requirement MOST cost-effectively?

A. Standard Reserved Instances ✅
B. Convertible Reserved Instances
C. On-Demand Instances
D. Spot Instances

Question 650

A company wants a fully managed service that centralizes and automates data protection across AWS services and hybrid workloads.

Which AWS service will meet these requirements?

A. AWS Artifact
B. AWS Backup ✅
C. AWS Batch
D. AWS Shield

Question 651

A company plans to migrate its application from on premises to the AWS Cloud. The company needs to gather usage and configuration data for the application components.

Which AWS service will meet these requirements?

A. AWS Database Migration Service (AWS DMS)
B. AWS Transfer Family

C. AWS Application Discovery Service ✅
D. AWS Global Accelerator

Question 652

Which design principle aligns with performance efficiency pillar of the AWS Well-Architected Framework?

A. Using serverless architectures
B. Scaling horizontally ✅
C. Measuring the cost of workloads
D. Using managed services

Question 653

A company wants to provide low latency to its users around the world.

Which feature of the AWS Cloud meet this requirement?

A. Global infrastructure ✅
B. Pay as-you-go pricing
C. Managed services
D. Economy of scale

Question 654

Which type of workload should a company run on Amazon EC2 Spot Instances?

A. A steady-state workload that requires a particular EC2 instance configuration for a long period of time
B. A workload that can be interrupted and can control costs ✅
C. A steady-state workload that does not require a long-term commitment
D. A workload that cannot be interrupted and can control costs

---

Question 655

Which AWS service provides command line access to AWS tools and resources directly from a web browser?

A. AWS CloudHSM
B. AWS CloudShell ✅
C. Amazon WorkSpaces
D. AWS Cloud Map

Question 656

A company has multiple AWS accounts. The company needs to receive a consolidated bill from AWS and must centrally manage security and compliance.

Which AWS service or feature should the company use to meet these requirements?

A. AWS Cost and Usage Report
B. AWS Organizations ✅
C. AWS Config
D. AWS Security Hub

Question 657

For which use case are Amazon EC2 On-Demand Instances MOST cost-effective?

A. Compute-intensive video transcoding that can be restarted if necessary
B. An instance in continual use for 1 month to conduct quality assurance tests ✅
C. An instance that runs a web server that will run for 1 year
D. An instance that runs a database that will run for 3 years

---

Question 658

A company has developed a new In-house application. The company does not have a way to determine or predict the usage demand that the application will create.

Which AWS Cloud computing benefit is the company seeking?

A. Easy to use
B. Cost-effective
C. Secure
D. Scalable and high performance ✅

Question 659

Which AWS offering can analyze a company's AWS environment to discover security vulnerabilities on Amazon EC2 instances?

A. Amazon Inspector ✅
B. Amazon Macie
C. AWS Shield Standard
D. Security groups

Question 660

A company plans to onboard new employees that will be working remotely. The company needs to set up Windows virtual desktops to create a working environment for the new employees. The employees must be able access the working environment from anywhere and by using their computer or a web browser.

Which AWS service or feature will meet these requirements?

A. Dedicated Hosts
B. AWS Global Accelerator
C. Amazon Workspaces ✅
D. Amazon CloudFront

Question 661

A company wants to visualize and manage AWS Cloud costs and usage for a specific period of time.

Which AWS service or feature will meet these requirements?

A. Cost Explorer ✅
B. Consolidated billing
C. AWS Organizations
D. AWS Budgets

Question 662

Which AWS service supports MySQL database engines?

A. Amazon Dynamo DB
B. Amazon RDS ✅
C. Amazon DocumentDB (with MongoDB compatibility)
D. Amazon ElastiCache

Question 663

A company purchased Amazon EC2 Standard Reserved Instances (RIs) for a workload in the AWS Cloud. The company needs to move part of the workload to an instance family that does not match the instance family of these Standard RIs.

How can the company take advantage of the Standard RIs that it no longer needs?

A. Contact the AWS Support team, and ask the team to sell the Standard RIs
B. Sell the Standard RIs on the Amazon EC2 Reserved Instance Marketplace ✅
C. Sell the Standard RIs as a third-party seller on the AWS Marketplace
D. Convert the Standard RIs to Savings Plans

Question 664

A company is releasing a business-critical application. Before the release, the company needs strategic planning assistance from AWS. During the release, the company needs AWS infrastructure event management and real-time support.

What should the company do to meet these requirements?

A. Access AWS Trusted Advisor
B. Contact the AWS Partner Network (APN)
C. Sign up for AWS Enterprise Support ✅
D. Contact AWS Professional Services

Question 665

A company wants to improve employee productivity by providing a way for employees to search for questions and retrieve specific answers. The company wants to use a single intelligent search interface.

Which AWS service will meet these requirements?

A. Amazon Connect
B. Amazon Kendra ✅
C. Amazon Lex
D. Amazon Comprehend

Question 666

A company is running and managing its own Docker environment on Amazon EC2 instances. The company wants an alternative to help manage cluster size, scheduling, and environment maintenance.

Which AWS service meets these requirements?

A. AWS Lambda
B. Amazon RDS
C. AWS Fargate ✅
D. Amazon Athena

Question 667

A network engineer needs to build a hybrid cloud architecture connecting on-premises networks to the AWS Cloud using AWS Direct Connect. The company has a few VPCs in a single AWS Region and expects to increase the number of VPCs to hundreds over time.

Which AWS service or feature should the engineer use to simplify and scale this connectivity as the VPCs increase in number?

A. VPC endpoints
B. AWS Transit Gateway ✅
C. Amazon Route 53
D. AWS Secrets Manager

Question 668

A company wants an Amazon S3 solution that provides access to object storage within single-digit milliseconds.

Which solution will meet these requirements?

A. S3 Express One Zone ✅
B. S3 Standard
C. S3 Glacier Flexible Retrieval
D. S3 Glacier Instant Retrieval

Question 669

A company runs an uninterruptible Amazon EC2 workload on AWS 24 hours a day, 7 days a week. The company will require the same instance family and instance type to run the workload for the next 12 months.

Which combination of purchasing options should the company choose to MOST optimize costs? (Choose two.)

A. Standard Reserved Instance ✅
B. Convertible Reserved Instance
C. Compute Savings Plan
D. Spot Instance
E. All Upfront payment ✅

Question 670

A company wants to run its application's code without having to provision and manage servers.

Which AWS service will meet this requirement?

A. AWS Glue
B. AWS Lambda ✅
C. AWS CodeDeploy
D. Amazon CodeGuru

Question 671

A company is planning to migrate to the AWS Cloud. The company needs to understand the existing on-premises usage and configuration. The company does not want to replicate its workloads to AWS, yet.

Which AWS service or tool will meet these requirements?

A. AWS Application Discovery Service ✅
B. AWS Application Migration Service
C. Cloud Migration Factory
D. AWS Transfer Family

Question 672

A company wants to allow its employees to work remotely from home. The company's employees use Windows or Linux desktops. The company's employees need access from anywhere and at anytime by using any supported devices.

Which AWS service will meet these requirements?

A. Amazon WorkSpaces ✅
B. Amazon AppStream 2.0
C. Amazon Keyspaces (for Apache Cassandra)
D. AWS Cloud9

Question 673

A company wants to test a new application.

Which AWS principle will help the company test the application?

A. Make long-term commitments in exchange for a cost discount.
B. Scale up and down when needed without any long-term commitments. ✅
C. Have total control over the application infrastructure.
D. Manage all of the maintenance tasks associated with the cloud.

Question 674

A company plans to launch an ecommerce website that contains many images for a product catalog. The company wants to keep the cost of running the website within a specific budget.

Which AWS service or tool should the company use to monitor the ongoing costs of the website?

A. AWS Cost Explorer ✅
B. AWS SDKs
C. EC2 Image Builder
D. AWS CloudFormation

Question 675

A company has deployed several public applications behind Application Load Balancers. The company wants to improve the performance of the applications.

Which AWS service will meet these requirements?

A. AWS Global Accelerator ✅
B. Amazon Connect
C. Amazon ElastiCache
D. Amazon CloudWatch

Question 676

A company has an on-premises application. The application has processing times of less than 5 minutes and is invoked only a few times each day. The company wants to move the application to the AWS Cloud.

Which AWS service will support this application MOST cost-effectively?

A. Amazon Elastic Container Service (Amazon ECS)
B. AWS Lambda ✅
C. Amazon Elastic Kubernetes Service (Amazon EKS)
D. Amazon EC2

Question 677

A company is learning about the perspectives of the AWS Cloud Adoption Framework (AWS CAF).

Which perspective of the AWS CAF addresses the strategy management capability?

A. Business perspective ✅
B. People perspective

C. Governance perspective
D. Operations perspective

Question 678

A company wants to assess its operational readiness. It also wants to identify and mitigate any operational risks ahead of a new product launch.

Which AWS Support plan offers guidance and support for this kind of event at no additional charge?

A. AWS Business Support ✅
B. AWS Basic Support
C. AWS Developer Support
D. AWS Enterprise Support

Question 679

A company wants to consolidate its call centers to improve the customer voice and chat experience with call center agents.

Which AWS service or tool will meet these requirements?

A. Amazon Simple Notification Service (Amazon SNS)
B. AWS Support Center
C. Amazon Cognito
D. Amazon Connect ✅

Question 680

A company needs to provision uninterruptible Amazon EC2 instances, when needed, and pay for compute capacity by the second.

Which EC2 instance purchasing option will meet these requirements?

A. Reserved Instances
B. Spot Instances
C. On-Demand Instances ✅
D. Dedicated Instances

Question 681

Which AWS service can migrate Amazon EC2 instances from one AWS Region to another?

A. AWS Application Migration Service ✅
B. AWS Database Migration Service (AWS DMS)
C. AWS DataSync
D. AWS Migration Hub

Question 682

A company needs to block SQL injection attacks.

Which AWS service or feature provides this functionality?

A. AWS WAF ✅
B. Network ACLs
C. Security groups
D. AWS Trusted Advisor

Question 683

A company wants to run its application on Amazon EC2 instances. The company needs to keep the application on-premises to meet a compliance requirement.

Which AWS offering will meet these requirements?

A. Dedicated Instances
B. Amazon CloudFront
C. AWS Fargate
D. AWS Outposts ✅

Question 684

A company wants to connect its supported AWS services and VPCs. The company does not want to expose its internal traffic to the public internet.

Which AWS service will meet these requirements?

A. Amazon Inspector
B. AWS PrivateLink ✅
C. Amazon Connect
D. AWS Internet Gateway

Question 685

Which AWS service can manage permissions for AWS resources by using policies?

A. Amazon Inspector
B. Amazon Detective
C. AWS Identity and Access Management (IAM) ✅
D. Amazon GuardDuty

Question 686

A company needs to run some of its workload in the AWS Cloud. The company needs to keep some of the workload in its own on-site data center due to compliance reasons.

Which AWS service will meet these requirements?

A. AWSConfig
B. AWS Outposts ✅
C. Amazon Lightsail
D. Amazon Connect

Question 687

A company wants to deploy an application that stores data in a relational database. The company wants database tasks, such as automated backups and database snapshots, to be managed by AWS.

Which AWS service will meet these requirements?

A. Amazon DocumentDB
B. Amazon RDS ✅
C. Amazon Elastic Block Store (Amazon EBS)
D. Amazon S3

Question 688

A company that operates on-premises servers decides to start a new line of business. The company determines that additional servers are required for the new workloads.

Which advantage of cloud computing can help the company to provision additional infrastructure as quickly as possible?

A. Benefit from massive economies of scale
B. Increase speed and agility ✅
C. Trade fixed expense for variable expense
D. Go global in minutes

Question 689

A company wants to establish a schedule for rotating database user credentials.

Which AWS service will support this requirement with the LEAST amount of operational overhead?

A. AWS Systems Manager
B. AWS Secrets Manager ✅
C. AWS License Manager
D. AWS Managed Services

Question 690

Which AWS service or feature can be used to create a private connection between an on-premises workload and an AWS Cloud workload?

A. Amazon Route 53
B. Amazon Macie
C. AWS Direct Connect ✅
D. AWS PrivateLink

Question 691

Which AWS service is used to provide encryption for Amazon EBS?

A. AWS Certificate Manager
B. AWS Systems Manager
C. AWS KMS ✅
D. AWS Config

Question 692

A company wants to manage its AWS Cloud resources through a web interface.

Which AWS service will meet this requirement?

A. AWS Management Console ✅
B. AWS CLI
C. AWS SDK
D. AWS Cloud9

Question 693

Which of the following are advantages of the AWS Cloud? (Choose two.)

A. Trade variable expenses for capital expenses
B. High economies of scale ✅
C. Launch globally in minutes ✅
D. Focus on managing hardware infrastructure
E. Overprovision to ensure capacity

Question 694

Which AWS Cloud benefit is shown by an architecture's ability to withstand failures with minimal downtime?

A. Agility
B. Elasticity
C. Scalability
D. High availability ✅

Question 695

A developer needs to maintain a development environment infrastructure and a production environment infrastructure in a repeatable fashion.

Which AWS service should the developer use to meet these requirements?

A. AWS Ground Station
B. AWS Shield
C. AWS IoT Device Defender
D. AWS CloudFormation ✅

Question 696

Which task is the customer's responsibility, according to the AWS shared responsibility model?

A. Maintain the security of the AWS Cloud.
B. Configure firewalls and networks. ✅
C. Patch the operating system of Amazon RDS instances.
D. Implement physical and environmental controls.

Question 697

A company wants to run a NoSQL database on Amazon EC2 instances.

Which task is the responsibility of AWS in this scenario?

A. Update the guest operating system of the EC2 instances.
B. Maintain high availability at the database layer.
C. Patch the physical infrastructure that hosts the EC2 instances. ✅
D. Configure the security group firewall.

Question 698

Which AWS service helps deliver highly available applications with fast failover for multi-Region and Multi-AZ architectures?

A. AWS WAF
B. AWS Global Accelerator. ✅
C. AWS Shield
D. AWS Direct Connect

Question 699

A company has a set of ecommerce applications. The applications need to be able to send messages to each other.

Which AWS service meets this requirement?

A. AWS Auto Scaling
B. Elastic Load Balancing
C. Amazon Simple Queue Service (Amazon SQS) ✅
D. Amazon Kinesis Data Streams

Question 700

What are the benefits of consolidated billing for AWS Cloud services? (Choose two.)

A. Volume discounts ✅
B. A minimal additional fee for use
C. One bill for multiple accounts ✅
D. Installment payment options
E. Custom cost and usage budget creation

Question 701

A user wants to review all Amazon S3 buckets with ACLs and S3 bucket policies in the S3 console.

Which AWS service or resource will meet this requirement?

A. S3 Multi-Region Access Points
B. S3 Storage Lens
C. AWS IAM Identity Center (AWS Single Sign-On)
D. Access Analyzer for S3 ✅

Question 702

What is the best resource for a user to find compliance-related information and reports about AWS?

A. AWS Artifact ✅
B. AWS Marketplace
C. Amazon Inspector
D. AWS Support

Question 703

Which AWS service enables companies to deploy an application close to end users?

A. Amazon CloudFront ✅
B. AWS Auto Scaling
C. AWS AppSync
D. Amazon Route 53

Question 704

Which AWS service or feature improves network performance by sending traffic through the AWS worldwide network infrastructure?

A. Route table
B. AWS Transit Gateway
C. AWS Global Accelerator ✅
D. Amazon VPC

Question 705

Which AWS service provides highly durable object storage?

A. Amazon S3 ✅
B. Amazon Elastic File System (Amazon EFS)
C. Amazon Elastic Block Store (Amazon EBS)
D. Amazon FSx

Question 706

Which responsibility belongs to AWS when a company hosts its databases on Amazon EC2 instances?

A. Database backups
B. Database software patches
C. Operating system patches ✅
D. Operating system installations

Question 707

Which of the following are advantages of moving to the AWS Cloud? (Choose two.)

A. The ability to turn over the responsibility for all security to AWS.
B. The ability to use the pay-as-you-go model. ✅
C. The ability to have full control over the physical infrastructure.
D. No longer having to guess what capacity will be required. ✅
E. No longer worrying about users access controls.

Question 708

Which AWS services or tools can identify rightsizing opportunities for Amazon EC2 instances? (Choose two.)

A. AWS Cost Explorer ✅
B. AWS Billing Conductor
C. Amazon CodeGuru
D. Amazon SageMaker
E. AWS Compute Optimizer ✅

Question 709

Which AWS service is a hybrid cloud storage service that provides on-premises users access to virtually unlimited cloud storage?

A. AWS DataSync
B. Amazon S3 Glacier
C. AWS Storage Gateway ✅
D. Amazon Elastic Block Store (Amazon EBS)

Question 710

A company plans to migrate to AWS and wants to create cost estimates for its AWS use cases.

Which AWS service or tool can the company use to meet these requirements?

A. AWS Pricing Calculator ✅
B. Amazon CloudWatch
C. AWS Cost Explorer
D. AWS Budgets

Question 711

Which tool should a developer use to integrate AWS service features directly into an application?

A. AWS Software Development Kit (SDK) ✅
B. AWS CodeDeploy
C. AWS Lambda
D. AWS Batch

Question 712

Which of the following is a recommended design principle of the AWS Well-Architected Framework?

A. Reduce downtime by making infrastructure changes infrequently and in large increments.
B. Invest the time to configure infrastructure manually.
C. Learn to improve from operational failures. ✅
D. Use monolithic application design for centralization.

Question 713

Using AWS Identity and Access Management (IAM) to grant access only to the resources needed to perform a task is a concept known as:

A. restricted access.
B. as-needed access.
C. least privilege access. ✅
D. token access.

Question 714

Which AWS service or tool can be used to set up a firewall to control traffic going into and coming out of an Amazon VPC subnet?

A. Security group
B. AWS WAF
C. AWS Firewall Manager
D. Network ACL ✅

Question 715

A company wants to operate a data warehouse to analyze data without managing the data warehouse infrastructure.

Which AWS service will meet this requirement?

A. Amazon Aurora
B. Amazon Redshift Serverless ✅
C. AWS Lambda
D. Amazon RDS

Question 716

How does AWS Cloud computing help businesses reduce costs? (Choose two.)

A. AWS charges the same prices for services in every AWS Region.
B. AWS enables capacity to be adjusted on demand. ✅
C. AWS offers discounts for Amazon EC2 instances that remain idle for more than 1 week.
D. AWS does not charge for data sent from the AWS Cloud to the internet.
E. AWS eliminates many of the costs of building and maintaining on-premises data centers. ✅

Question 717

A company wants to grant users in one AWS account access to resources in another AWS account. The users do not currently have permission to access the resources.

Which AWS service will meet this requirement?

A. IAM group
B. IAM role ✅
C. IAM tag
D. IAM Access Analyzer

Question 718

Which task is the responsibility of AWS when using AWS services?

A. Management of IAM user permissions
B. Creation of security group rules for outbound access
C. Maintenance of physical and environmental controls ✅
D. Application of Amazon EC2 operating system patches
